Carbon Reduction Plan

Introduction

- 🔗 We are facing a global climate crisis, and the UK has committed to reduce carbon emissions to net zero not later than 2050
- 🔗 Fulcrum Automotive Solutions recognises the need for positive action and is committed to achieving net zero by 2050.
- 🔗 This plan sets out our baseline and approach to achieving this

Baseline Emissions

- Our baseline greenhouse gas (GHG) inventory is in line with the GHG Protocol . This has allowed us to fully understand our emissions, and which are our most carbon intensive activities (our 'carbon hotspots'). We have been able to use this GHG inventory to recognise our risks and identify opportunities to reduce them

2020 baseline year emissions			Kg C02e
Scope 1	Company Vehicles	Use of vehicles for company business	1350
Scope 2	Electricity	Consumed for our offices	7232
Scope 3	Water Supply/Treatment	Used by our offices	535
	Commuting	by our office based staff to/from office	19817
	Waste generation	from our offices	501
	Homeworking	by our employees	7326

Carbon Reduction Projects

- Reduce our scope 1 & 2 emissions
 - Improve energy efficiency
 - Increase use of Electric & Hybrid Vehicles
 - Commit to electricity tariffs using renewable solutions
 - Reduce driven miles for business
 - Encourage home working where appropriate
- Reduce our scope 3 emissions
 - Recycle more of our waste
 - Encourage our employees to use non-fossil fuel based commuting methods where possible

2025 Reporting Year

- A number of projects and initiatives have continued to reduce our carbon production, with a reduction of 17% over baseline 2020

2024 year emissions			Kg C02e
Scope 1	Company Vehicles	Use of vehicles for company business	978
Scope 2	Electricity	Consumed for our offices	6612
Scope 3	Water Supply/Treatment	Used by our offices	525
	Commuting	by our office based staff to/from office	12757
	Waste generation	from our offices	307
	Homeworking	by our employees	7125
